SUBMISSION OF ENGLISH LANGUAGE PRELIMINARY EXAMINATION REPORT

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

Submitted herewith is an English language Preliminary Examination Report for the above-identified application.

Respectfully submitted,

Mark S. Bicks

1.	Transmittal o	of the	translation	to	the applicant.
4.	A CONTRACTOR (JI WILL	n angianoti	w	uic applicant

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter I).
The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter II).

2. Transmittal of the copy of the translation to the designated or elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following designated or elected Offices requiring such translation:

None

The following designated or elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, EG, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KR, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability (Chapter II).

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned within the applicable time limit (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

.Box No. I	Basis of this opinion
1. With filed.	regard to the language, this opinion has been established on the basis of the international application in the language in which it was unless otherwise indicated under this item.
	This opinion has been established on the basis of a translation from the original language into the following language
-	. which is the language of a translation furnished for the purposes of international search (under
	Rule 12.3 and 23.1(b)).
2. With inven	regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed ation, this opinion has been established on the basis of:
a.	type of material
	a sequence listing
	table(s) related to the sequence listing
b.	format of material
	in written format
	in computer readable form
c.	time of filing/furnishing
	contained in the international application as filed.
[filed together with the international application in computer readable form.
[furnished subsequently to this Authority for the purposes of search.
1	In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

2. Citations and explanations:

Reference is made to the following documents:

D1: EP-A-O 900 584 (BOLL & KIRCH FILTERBAU GMBH)
10 March 1999 (1999-03-10)

D2: DE 199 56 859 Al (HYDAC FILTERTECHNIK GMBH) 7
June 2001 (2001-06-07)

1. Novelty

Document D1, which is considered to be the closest prior art, discloses a filter with a plurality of filter elements arranged between two rotating end portions. The rotatable end portions are guided over a sealing device, the drive taking the form of a rod-like central drive part around which the filter elements are coaxially arranged (see D1, abstract and figures).

One position of the filter elements is embodied as a backwashing position, such that one filter is cleaned when the others are in operation. The subject matter of claims 1-3 is therefore novel (PCT Article 33(2)).

International application No.

PCT/EP2004/013275

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

2. Inventive step

- 2.1 The subject matter of claim 4 of the present application differs from D1 only in that the end portions are detachably connected to each other. It is questionable, on the one hand, whether such detachability is not also provided for mounting purposes in D1, even if this is not explicitly disclosed. On the other hand, the decision as to whether or not a connection is detachable or non-detachable seems to be a routine procedure for a person skilled in the art. Therefore, the subject matter of claim 4 is not based on an inventive step (PCT Article 33(3)).
- 2.2 Document D2, which was mentioned in the application, describes an alternative prior art in which the filter is essentially of similar construction, but in which it is not the filter, but rather the cleaning position that is configured to be moved by means of backwashing arms. The filter elements in this filter are conical slit-screen filter elements. Since these features have already been used for the same purpose in a similar filter, it is obvious to a person skilled in the art, if he wishes to achieve the same aim with a filter according to document D1, to apply these features with corresponding and known effects to the subject matter of D1. In this way, he would arrive at a filter device as per claims 7 and 10, without this involving an

International application No.
PCT/EP2004/013275

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; distins and explanations supporting such statement inventive step. Therefore, the subject matter of claims 7 and 10 also fails to satisfy the requirements of PCT Article 33(3).

2.3 The other dependent claims merely seem to contain features that are already known from the prior art and which would therefore be easily combined, without this involving an inventive step, or whose embodiment is a routine matter for a person skilled in the art (PCT Article 33(3)).

3. Industrial applicability

Industrial applicability is obvious.
